

EMERITI RECOGNITION

distance delivery systems and sharing those methods with other Extension professionals.

She has conducted essential research on human nutrition and safe food-handling practices, addressed food safety issues in Alaska associated with processing and storage of traditional foods, garnered funding to foster development of new agricultural and seafood-based human food products and cottage industries, all of which ultimately served to better the lives and improve the livelihoods of Alaskans.

She is described by her colleagues as an exceptional mentor; and served as program leader and chair and as a member or chair of numerous University committees; and was energetically involved throughout her career in professional organizations; and has received awards at State and National levels for the excellence of her endeavors.

The University of Alaska Fairbanks expresses its deep appreciation to Dr. Kristine A. Long for her contributions to the State of Alaska and the University.
